Associate Professor, Department of Earth System Science - UCI

VISUALIZATION ACROSS DISCIPLINES: VISUALIZATION IN THE RESEARCH AND COMMUNICATION OF EARTH SYSTEM SCIENCE

Steven J. Davis will discuss data visualizations and related imagery use in the earth system sciences. His research, published in journals such as *Science* and *Nature Sustainability*, focuses broadly on the interactions of energy, agriculture, water, climate, and international trade.

This seminar is the first in the Center for Ethnography's 2018- 2019 thematic seminar series, "Visualization Across Disciplines." The series is meant to advance creative collection, production and analysis of visualizations in ethnography, leveraging new technical possibilities as well as insights from the arts, sciences, and informatics.
